

2008 ADDENDUM HIGHLIGHTS

The following is a list of significant Addendum Highlights to ICD-9-CM for the 2008 Versions becoming effective October 1, 2007.

DISEASE TABULAR

- Code 005.1** – This code title was revised to read “Botulism food poisoning.”
- Code 040.4** – This new subcategory code was added to separately identify “Other specified botulism” and includes codes:
040.41 – Infant botulism
040.42 – Wound botulism
- Code 058** – This new code category was added to separately identify “Other human herpesvirus.”
- Code 058.1** – This new subcategory code was added to separately identify “Roseola infantum” and includes codes:
058.10 – Roseola infantum, unspecified
058.11 – Roseola infantum due to human herpesvirus 6
058.12 – Roseola infantum due to human herpesvirus 7
- Code 058.2** – This new subcategory code was added to separately identify “Other human herpesvirus encephalitis” and includes codes:
058.21 – Human herpesvirus 6 encephalitis
058.29 – Other human herpesvirus encephalitis
- Code 058.8** – This new subcategory code was added to separately identify “Other human herpesvirus infections” and includes codes:
058.81 – Human herpesvirus 6 infection
058.82 – Human herpesvirus 7 infection
058.89 – Other human herpesvirus infection
- Code 079.83** – This new code was added to separately identify “Parvovirus B19.”
- Code 200** – This category title was revised to read “Lymphosarcoma and reticulosarcoma and other specified malignant tumors of lymphatic tissue.”
- Code 200.3** – This new code was added to separately identify “Marginal zone lymphoma.”
- Code 200.4** – This new code was added to separately identify “Mantle cell lymphoma.”
- Code 200.5** – This new code was added to separately identify “Primary central nervous system lymphoma.”
- Code 200.6** – This new code was added to separately identify “Anaplastic large cell lymphoma.”
- Code 200.7** – This new code was added to separately identify “Large cell lymphoma.”
- Code 233.3** – This code was re-classified as a new subcategory “Other and unspecified female genital organs” and includes codes:
233.30 – Unspecified female genital organ
233.31 – Vagina
233.32 – Vulva
233.39 – Other female genital organ
- Code 255.4** – This code was re-classified as a new subcategory “Corticoadrenal insufficiency” and includes new codes:
255.41 – Glucocorticoid deficiency
255.42 – Mineralocorticoid deficiency
- Code 258.0** – This code was re-classified as a new subcategory “Polyglandular activity in multiple endocrine adenomatosis” and includes codes:
258.01 – Multiple endocrine neoplasia [MEN] type I
258.02 – Multiple endocrine neoplasia [MEN] type IIA
258.03 – Multiple endocrine neoplasia [MEN] type IIB
- Code 284.8** – This code was re-classified as a new subcategory “Other specified aplastic anemias” and includes codes:
284.81 – Red cell aplasia (acquired) (adult) (with thymoma)
284.89 – Other specified aplastic anemias
- Code 288.66** – This new code was added to separately identify “Bandemia.”
- Code 315.34** – This new code was added to separately identify “Speech and language developmental delay due to hearing loss.”
- Code 331.5** – This new code was added to separately identify “Idiopathic normal pressure hydrocephalus (INPH).”
- Code 359.2** – This code was re-classified as a new subcategory “Myotonic disorders” and includes codes:
359.21 – Myotonic muscular dystrophy
359.22 – Myotonia congenita
359.23 – Myotonic chondrodystrophy
359.24 – Drug-induced myotonia
359.29 – Other specified myotonic disorder
- Code 359.3** – This code title was revised to read “Periodic paralysis.”
- Code 364.8** – This code was re-classified as a new subcategory “Other disorders of iris and ciliary body” and includes codes:
364.81 – Floppy iris syndrome
364.89 – Other disorders of iris and ciliary body
- Code 388.45** – This new code was added to separately identify “Acquired auditory processing disorder.”
- Code 389.05** – This new code was added to separately identify “Conductive hearing loss, unilateral.”
- Code 389.06** – This new code was added to separately identify “Conductive hearing loss, bilateral.”
- Code 389.13** – This new code was added to separately identify “Neural hearing loss, unilateral.”
- Code 389.14** – This code title was revised to read “Central hearing loss.”
- Code 389.17** – This new code was added to separately identify “Sensory hearing loss, unilateral.”
- Code 389.18** – This code title was revised to read “Sensorineural hearing loss, bilateral.”
- Code 389.2** – This code was re-classified as a new subcategory “Mixed conductive and sensorineural hearing loss” and includes codes:
389.20 – Mixed hearing loss, unspecified
389.21 – Mixed hearing loss, unilateral
389.22 – Mixed hearing loss, bilateral
- Code 389.7** – This code title was revised to read “Deaf, nonspeaking, not elsewhere classifiable.”
- Code 414.2** – This new code was added to separately identify “Chronic total occlusion of coronary artery.”
- Code 415.12** – This new code was added to separately identify “Septic pulmonary embolism.”
- Code 423.3** – This new code was added to separately identify “Cardiac tamponade.”
- Code 440.4** – This new code was added to separately identify “Chronic total occlusion of artery of the extremities.”
- Code 449** – This new code was added to separately identify “Septic arterial embolism.”
- Code 488** – This new code was added to separately identify “Influenza due to identified avian influenza virus.”
- Code 525.7** – This new subcategory was added to separately identify “Endosseous dental implant failure” and includes codes:
525.71 – Osseointegration failure of dental implant
525.72 – Post-osseointegration biological failure of dental implant
525.73 – Post-osseointegration mechanical failure of dental implant
525.79 – Other endosseous dental implant failure
- Code 624.0** – This code was re-classified as a new subcategory “Dystrophy of vulva” and includes codes:
624.01 – Vulvar intraepithelial neoplasia I [VIN I]
624.02 – Vulvar intraepithelial neoplasia II [VIN II]
624.09 – Other dystrophy of vulva
- Code 664.6** – This new code was added to separately identify “Anal sphincter tear complicating delivery, not associated with third-degree perineal laceration.”
- Code 733.45** – This new code was added to separately identify “Jaw.”
- Code 787.2** – This code was re-classified as a new subcategory “Dysphagia” and includes codes:
787.20 – Dysphagia, unspecified
787.21 – Dysphagia, oral phase
787.22 – Dysphagia, oropharyngeal phase
787.23 – Dysphagia, pharyngeal phase
787.24 – Dysphagia, pharyngoesophageal phase
787.29 – Other dysphagia
- Code 789.5** – This code was re-classified as a new subcategory “Ascites” and includes codes:
789.51 – Malignant ascites
789.59 – Other ascites
- Code 999.3** – This code was re-classified as a new subcategory “Other infection” and includes codes:
999.31 – Infection due to central venous catheter
999.39 – Infection following other infusion, injection, transfusion, or vaccination
- Code V12.53** – This new code was added to separately identify “Sudden cardiac arrest.”
- Code V12.54** – This new code was added to separately identify “Transient ischemic attack (TIA), and cerebral infarction without residual deficits.”
- Code V13.22** – This new code was added to separately identify “Personal history of cervical dysplasia.”

2008 ADDENDUM HIGHLIGHTS

- Code V16.52** – This new code was added to separately identify “Bladder.”
- Code V17.4** – This code was re-classified as a new subcategory “Other cardiovascular diseases” and includes codes:
V17.41 – Family history of sudden cardiac death (SCD)
V17.49 – Family history of other cardiovascular diseases
- Code V18.1** – This code was re-classified as a new subcategory “Other endocrine and metabolic diseases” and includes codes:
V18.11 – Multiple endocrine neoplasia [MEN] syndrome
V18.19 – Other endocrine and metabolic diseases
- Code V25.04** – This new code was added to separately identify “Counseling and instruction in natural family planning to avoid pregnancy.”
- Code V26.4** – This code was re-classified as a new subcategory “General counseling and advice” and includes codes:
V26.41 – Procreative counseling and advice using natural family planning
V26.49 – Other procreative counseling and advice
- Code V26.8** – This code was re-classified as a new subcategory “Other specified procreative management” and includes codes:
V26.81 – Encounter for assisted reproductive fertility procedure cycle
V26.89 – Other specified procreative management
- Code V49.85** – This new code was added to separately identify “Dual sensory impairment.”
- Code V68.0** – This code was re-classified as a new subcategory “Issue of medical certificates” and includes codes:
V68.01 – Disability examination
V68.09 – Other issue of medical certificates
- Code V72.12** – This new code was added to separately identify “Encounter for hearing conservation and treatment.”
- Code V73.81** – This new code was added to separately identify “Human papillomavirus (HPV).”
- Code V84.8** – This code was re-classified as a new subcategory “Genetic susceptibility to other disease” and includes codes:
V84.81 – Genetic susceptibility to multiple endocrine neoplasia [MEN]
V84.89 – Genetic susceptibility to other disease
- Code E928.6** – This new code was added to separately identify “Environmental exposure to harmful algae and toxins.”
- Code E933.6** – This new code was added to separately identify “Oral bisphosphonates.”
- Code E933.7** – This new code was added to separately identify “Intravenous bisphosphonates.”

PROCEDURE TABULAR

- Code 00.18** – This code title was revised to read “Infusion of immunosuppressive antibody therapy.”
- Code 00.19** – This code was added to separately identify “Disruption of blood brain barrier via infusion [BBBD].”
- Code 00.74** – This code title was revised to read “Hip bearing surface, metal-on-polyethylene.”
- Code 00.75** – This code title was revised to read “Hip bearing surface, metal-on-metal.”
- Code 00.76** – This code title was revised to read “Hip bearing surface, ceramic-on-ceramic.”
- Code 00.77** – This code title was revised to read “Hip bearing surface, ceramic-on-polyethylene.”
- Code 00.94** – This new code was added to separately identify “Intra-operative neurophysiologic monitoring.”
- Code 01.10** – This new code was added to separately identify “Intracranial pressure monitoring.”
- Code 01.16** – This new code was added to separately identify “Intracranial oxygen monitoring.”
- Code 01.17** – This new code was added to separately identify “Brain temperature monitoring.”
- Code 07.81** – This code title was revised to read “Other partial excision of thymus.”
- Code 07.82** – This code title was revised to read “Other total excision of thymus.”
- Code 07.83** – This new code was added to separately identify “Thoracoscopic partial excision of thymus.”
- Code 07.84** – This new code was added to separately identify “Thoracoscopic total excision of thymus.”
- Code 07.92** – This code title was revised to read “Other incision of thymus.”
- Code 07.95** – This new code was added to separately identify “Thoracoscopic incision of thymus.”
- Code 07.98** – This new code was added to separately identify “Other and unspecified thoracoscopic operations on thymus.”

- Code 07.99** – This code title was revised to read “Other and unspecified operations on thymus.”
- Code 32.20** – This new code was added to separately identify “Thoracoscopic excision of lesion or tissue of lung.”
- Code 32.3** – This code was re-classified as a new subcategory “Segmental resection of lung” and includes codes:
32.30 – Thoracoscopic segmental resection of lung
32.39 – Other and unspecified segmental resection of lung
- Code 32.4** – This code was re-classified as a new subcategory “Lobectomy of lung” and includes codes:
32.41 – Thoracoscopic lobectomy of lung
32.49 – Other lobectomy of lung
- Code 32.5** – This code was re-classified as a new subcategory and revised to read “Pneumonectomy” and includes codes:
32.50 – Thoracoscopic pneumonectomy
32.59 – Other and unspecified pneumonectomy
- Code 33.20** – This new code was added to separately identify “Thoracoscopic lung biopsy.”
- Code 34.06** – This new code was added to separately identify “Thoracoscopic drainage of pleural cavity.”
- Code 34.20** – This new code was added to separately identify “Thoracoscopic pleural biopsy.”
- Code 34.24** – This code title was revised to read “Other pleural biopsy.”
- Code 34.52** – This new code was added to separately identify “Thoracoscopic decortication of lung.”
- Code 39.8** – This code title was revised to read “Operations on carotid body, carotid sinus and other vascular bodies.”
- Code 50.13** – This new code was added to separately identify “Transjugular liver biopsy.”
- Code 50.14** – This new code was added to separately identify “Laparoscopic liver biopsy.”
- Code 53.41** – This code title was revised to read “Repair of umbilical hernia with graft or prosthesis.”
- Code 53.61** – This code title was revised to read “Incisional hernia repair with graft or prosthesis.”
- Code 53.69** – This code title was revised to read “Repair of other hernia of anterior abdominal wall with graft or prosthesis.”
- Code 70.53** – This new code was added to separately identify “Repair of cystocele and rectocele with graft or prosthesis.”
- Code 70.54** – This new code was added to separately identify “Repair of cystocele with graft or prosthesis.”
- Code 70.55** – This new code was added to separately identify “Repair of rectocele with graft or prosthesis.”
- Code 70.63** – This new code was added to separately identify “Vaginal construction with graft or prosthesis.”
- Code 70.64** – This new code was added to separately identify “Vaginal reconstruction with graft or prosthesis.”
- Code 70.78** – This new code was added to separately identify “Vaginal suspension and fixation with graft or prosthesis.”
- Code 70.93** – This new code was added to separately identify “Other operations on cul-de-sac with graft or prosthesis.”
- Code 70.94** – This new code was added to separately identify “Insertion of biological graft.”
- Code 70.95** – This new code was added to separately identify “Insertion of synthetic graft or prosthesis.”
- Code 84.58** – This code was deleted.
- Code 84.8** – This new subcategory code was added to separately identify “Insertion, replacement and revision of posterior spinal motion preservation device(s)” and includes codes:
84.80 – Insertion or replacement of interspinous process device(s)
84.81 – Revision of interspinous process device(s)
84.82 – Insertion or replacement of pedicle-based dynamic stabilization device(s)
84.83 – Revision of pedicle-based dynamic stabilization device(s)
84.84 – Insertion or replacement of facet replacement device(s)
84.85 – Revision of facet replacement device(s)
- Code 88.59** – This new code was added to separately identify “Intra-operative fluorescence vascular angiography.”
- Code 92.4** – This new subcategory code was added to separately identify “Intra-operative radiation procedures” and includes code:
92.41 – Intra-operative electron radiation therapy
- Code 99.14** – This code title was revised to read “Injection or infusion of gamma globulin.”
